

Nama: Bilqis Rokhimmatul Khajjah Mabruroh

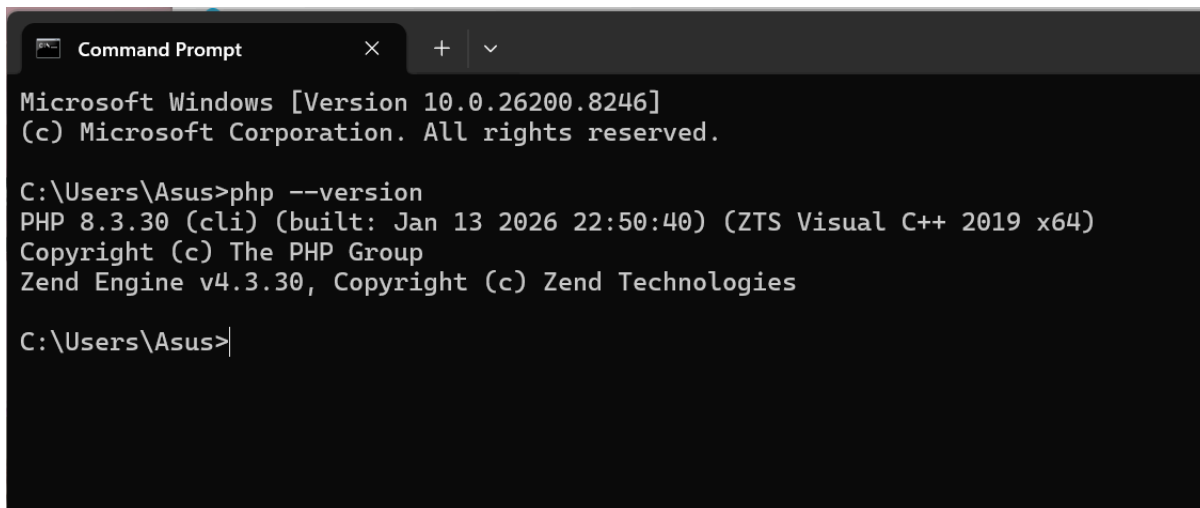

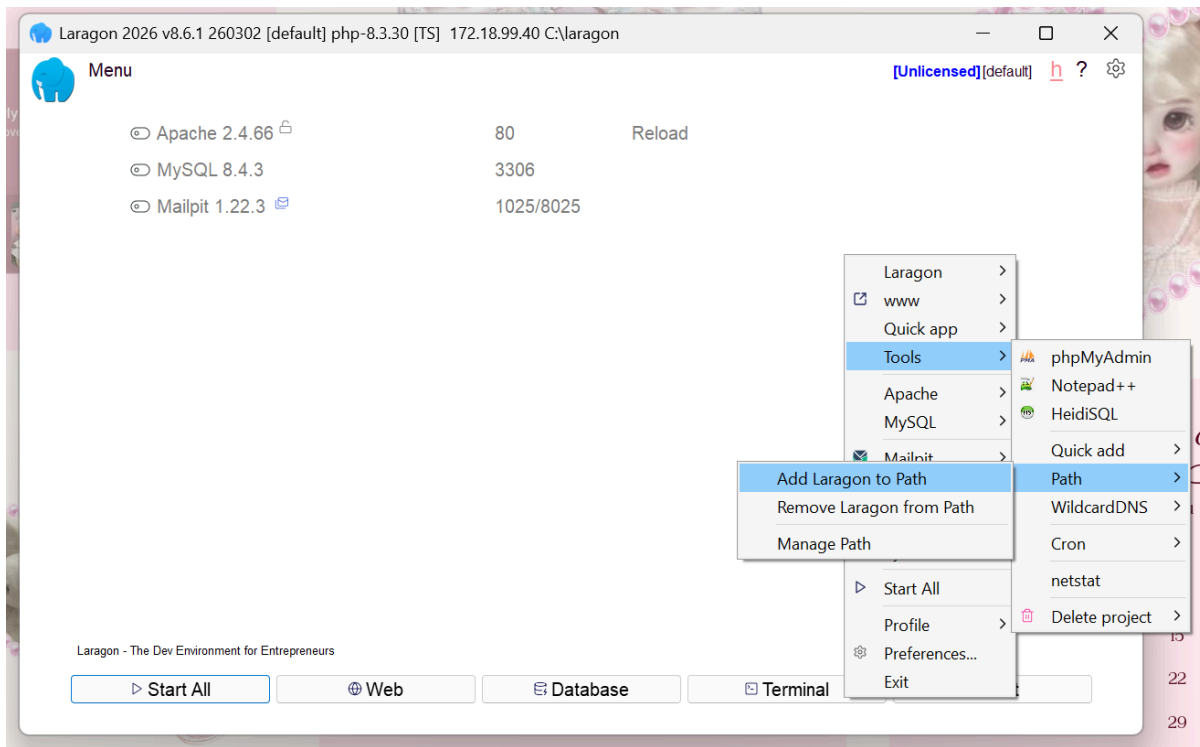

NIM: 242410101051

Kelas: A (Pemrograman Website)

AKTIVITAS MANDIRI 1 — Instalasi & Setup Proyek Laravel

1. Instal XAMPP terbaru, pastikan PHP 8.2+ tersedia (cek: `php --version` di terminal)

Di sini saya menggunakan Laragon, kemudian menambahkan laragon ke path.

2. Instal Composer dari getcomposer.org, verifikasi dengan: `composer --version`

```
Command Prompt
Microsoft Windows [Version 10.0.26200.8246]
(c) Microsoft Corporation. All rights reserved.

C:\Users\Asus>php --version
PHP 8.3.30 (cli) (built: Jan 13 2026 22:50:40) (ZTS Visual C++ 2019 x64)
Copyright (c) The PHP Group
Zend Engine v4.3.30, Copyright (c) Zend Technologies

C:\Users\Asus>composer --version
Composer version 2.9.4 2026-01-22 14:08:50
PHP version 8.3.30 (C:\laragon\bin\php\php-8.3.30-Win32-vs16-x64\php.exe)
Run the "diagnose" command to get more detailed diagnostics output.

C:\Users\Asus>
```

3. Buat proyek Laravel baru: `composer create-project laravel/laravel siak-app`

```
PROBLEMS OUTPUT DEBUG CONSOLE TERMINAL PORTS php
PS C:\laragon\www\Pemrogramn WEB> composer create-project laravel/laravel bilsport
Creating a "laravel/laravel" project at "./bilsport"
Installing laravel/laravel (v13.3.0)
- Installing laravel/laravel (v13.3.0): Extracting archive
Created project in C:\laragon\www\Pemrogramn WEB\bilsport
> @php -r "file_exists('.env') || copy('.env.example', '.env');"
Loading composer repositories with package information
Updating dependencies
Lock file operations: 107 installs, 0 updates, 0 removals
- Locking brick/math (0.14.8)

2026-04-28 15:40:20 /favicon.ico ..... ~ 0.32ms
```

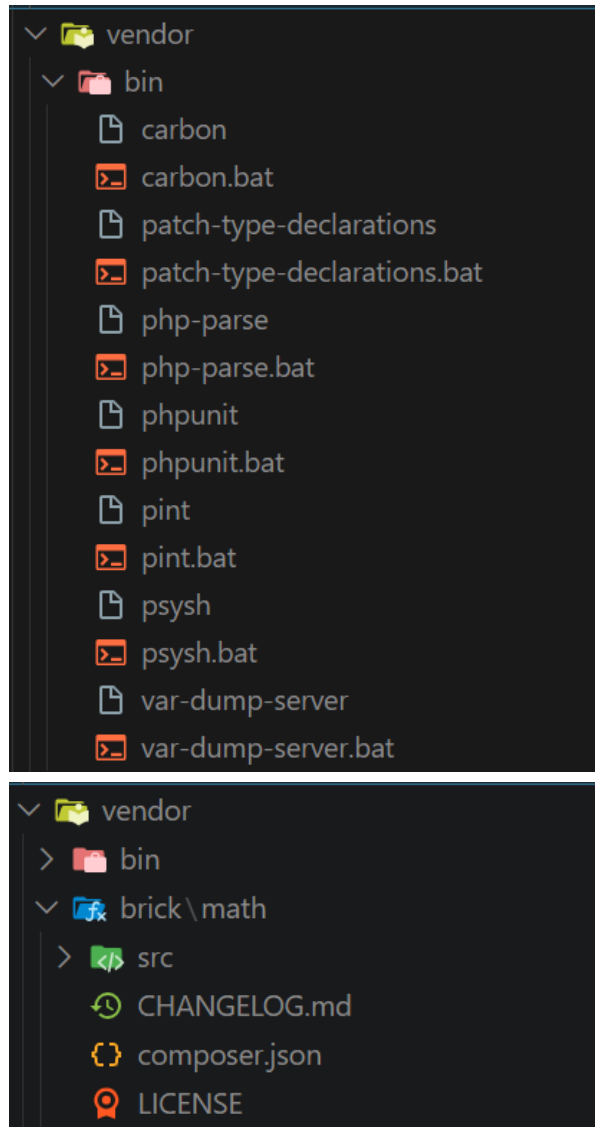

8. Eksplorasi struktur folder, buka setiap folder dan pahami fungsinya

No.	Folder	Penjelasan
1.		Folder app/ digunakan untuk menyimpan logika utama aplikasi, seperti controller. Pada proyek ini, saya menggunakan folder ini untuk menyimpan PageController yang berfungsi mengatur alur data dan logika aplikasi.
2.		Folder bootstrap/ berisi file bootstrap aplikasi, termasuk file app.php yang digunakan untuk melakukan inisialisasi awal saat aplikasi dijalankan.
3.		Folder config/ berisi file konfigurasi aplikasi, seperti pengaturan database, session, dan lainnya, meskipun pada proyek ini belum digunakan secara mendalam.

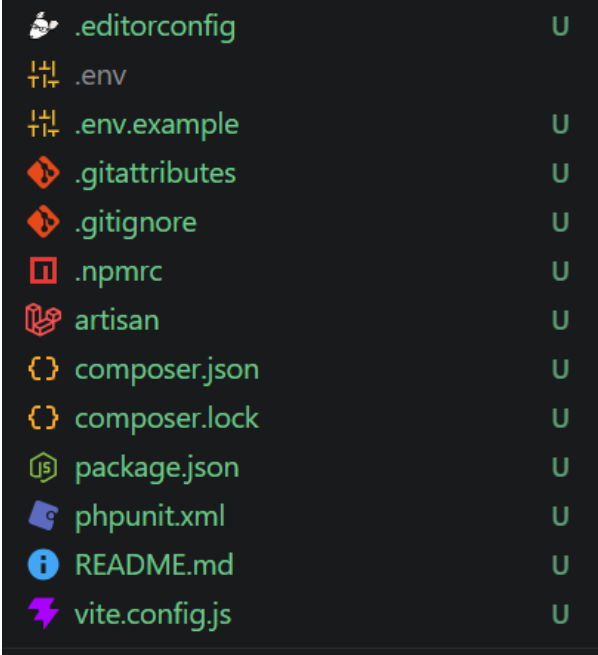

4.		Folder database/ berfungsi untuk menyimpan file yang berkaitan dengan database, seperti migration, seeder, dan factory. Namun pada proyek ini, folder tersebut belum digunakan karena aplikasi belum menggunakan database.
5.		Folder public/ berfungsi untuk menyimpan aset statis seperti gambar, CSS, dan JavaScript. Pada proyek ini, saya menyimpan gambar bunga di dalam folder public/images dan memanggilnya menggunakan helper asset().
6.		Folder resources/views/ digunakan untuk menyimpan seluruh tampilan atau user interface aplikasi. Di dalamnya terdapat file Blade seperti login, dashboard, pengelolaan, dan profile, serta folder layouts untuk layout utama dan components untuk komponen seperti navbar dan footer.

7.	 A screenshot of a file explorer showing the 'routes' folder. It contains two files: 'console.php' and 'web.php', both with PHP icons and a green dot status indicator.	Folder routes/ berisi file routing, yaitu web.php, yang digunakan untuk mendefinisikan URL dan menghubungkannya dengan method pada controller.
8.	 A screenshot of a file explorer showing the 'storage' folder. It contains subfolders 'app', 'private', 'public', 'cache', 'sessions', 'testing', and 'views'. It also contains files '.gitignore' and 'laravel.log'. Each item has a green dot status indicator.	Folder storage/ digunakan untuk menyimpan file yang dihasilkan oleh sistem, seperti cache, log, dan file upload. Folder ini membantu Laravel dalam menyimpan data sementara maupun hasil proses aplikasi.
9.	 A screenshot of a file explorer showing the 'tests' folder. It contains subfolders 'Feature' and 'Unit'. Each folder contains a file named 'ExampleTest.php'. There is also a file named 'TestCase.php'. All items have a green dot status indicator.	Folder tests/ digunakan untuk menyimpan file pengujian aplikasi, baik unit test maupun feature test, untuk memastikan bahwa sistem berjalan dengan baik.

10.

Folder vendor/ berisi library atau dependensi dari Laravel yang diinstall melalui Composer, dan biasanya tidak diubah secara langsung oleh developer.

11.		Pada bagian root Laravel terdapat beberapa file penting seperti .env yang digunakan untuk menyimpan konfigurasi aplikasi, .env.example sebagai template, .gitignore untuk mengatur file yang tidak diupload ke repository, .gitattributes dan .editorconfig untuk menjaga konsistensi file dan kode, artisan sebagai command-line tool Laravel, composer.json dan composer.lock untuk mengelola dependency PHP, package.json untuk dependency frontend, phpunit.xml untuk konfigurasi testing, README.md sebagai dokumentasi project, serta vite.config.js untuk mengatur asset frontend, yang secara keseluruhan berfungsi mendukung proses pengembangan dan menjalankan aplikasi Laravel dengan baik.
-----	---	--

9. Jalankan php artisan route:list dan catat route apa saja yang sudah terdaftar

```
● PS C:\laragon\www\Pemrograman WEB\bilsport> php artisan route:list

GET|HEAD / ..... routes/web.php:5
GET|HEAD storage/{path} storage.local > vendor/laravel/framework/src/Illuminate/Filesystem/Filesystem...
PUT      storage/{path} storage.local.upload > vendor/laravel/framework/src/Illuminate/Filesystem/Fi...
GET|HEAD up vendor/laravel/framework/src/Illuminate/Foundation/Configuration/ApplicationBuilder.php:...

Showing [4] routes

○ PS C:\laragon\www\Pemrograman WEB\bilsport> █
```

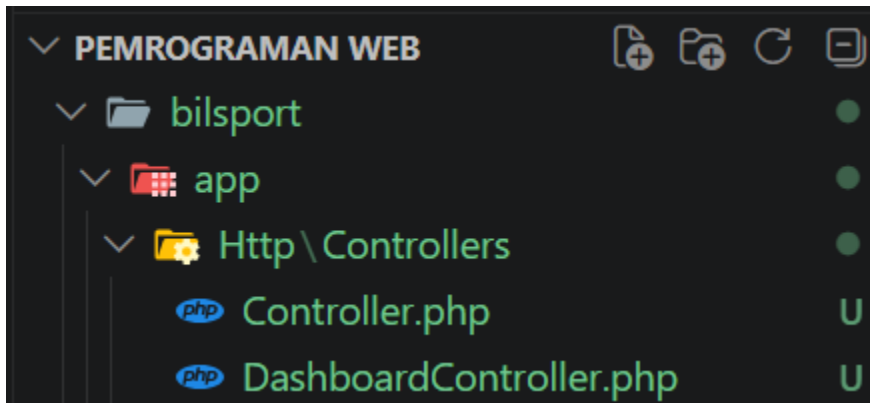

AKTIVITAS MANDIRI 2 — Membuat Routing & Controller Dashboard

1. Buat Controller DashboardController: php artisan make:controller DashboardController

```
PS C:\laragon\www\Pemrograman WEB\bilspport> php artisan make:controller DashboardController

INFO Controller [C:\laragon\www\Pemrograman WEB\bilspport\app\Http\Controllers\DashboardController.php]
created successfully.

PS C:\laragon\www\Pemrograman WEB\bilspport>
```

2. Tambahkan method index() yang mengembalikan view('dashboard') di DashboardController

```
> OPEN EDITORS
PEMROGRAMAN WEB
  bilspport
    app
      Http\Controllers
        Controller.php
        DashboardController.php
      Models
        User.php
      Providers
      bootstrap
      config

bilspport > app > Http > Controllers > DashboardController.php
1  <?php
2
3  namespace App\Http\Controllers;
4
5  use Illuminate\Http\Request;
6
7  class DashboardController extends Controller
8  {
9      public function index()
10     {
11         return view('dashboard');
12     }
13 }
```

3. Daftarkan route di routes/web.php: `Route::get('/dashboard', [DashboardController::class, 'index'])->name('dashboard')`

The screenshot shows a code editor with a file explorer on the left and a code editor on the right. The file explorer shows the project structure with 'web.php' selected. The code editor shows the content of 'web.php' with PHP code for routing.

```
1 <?php
2
3 use App\Http\Controllers\DashboardController;
4 use Illuminate\Support\Facades\Route;
5
6 Route::get('/', function () {
7     return view('welcome');
8 });
9
10 Route::get('/dashboard', [DashboardController::class, 'index'])->name('dashboard');
11
```

4. Buat file view sementara resources/views/dashboard.blade.php berisi '<h1>Dashboard SIAK</h1>'

The screenshot shows a code editor with the following structure:

- EXPLORER (Left Panel):**
 - PROJECT
 - ng U
 - OPEN EDITORS
 - PEMROGRAMAN WEB
 - bilspport
 - public
 - robots.txt
 - resources
 - css
 - js
 - views
 - components
 - footer.blade.php
 - navbar.blade.php
 - layouts
 - app.blade.php
 - dashboard.blade.php
 - tentang.blade.php
 - welcome.blade.php
 - routes
 - console.php
 - web.php
 - storage
 - tests
 - vendor
 - .editorconfig

- Code Editor (Right Panel):**
- dashboards.blade.php M
- tentang.blade.php M
- welcome.blade.php
- app.js M
- web.php M

```

1  @extends('layouts.app')
2
3  @section('title', 'Beranda')
4
5  @section('content')
6      <section class="hero">
7          <h1>Selamat Datang di Sistem Booking Lapangan Jember</h1>
